CORE CLOUD & DEVOPS

- Terraform / Bicep/ IaC
- Azure (VNets, ExpressRoute, Landing Zones)
- Hub & Spoke
- Azure Kubernetes Service (AKS)
- CNI Overlay, AGIC
- Docker & Helm
- GitHub Actions / Azure DevOps/ YAML Pipelines
- GitOps — ArgoCD/Flux CD
- Azure CNI, NGINX / AGIC Ingress
- HPA / VPA Autoscaling
- SonarQube, Trivy, SAST/DAST
- Cost Optimization
- MCP (Model Context Protocol)
- Azure AI Search (RAG), Azure AI Foundry
- Prompt engineering and tool calling
- Slack Automation

MONITORING & OBSERVABILITY

- Dynatrace
- Azure Monitor / Log Analytics
- Application Insights
- Prometheus & Grafana
- ELK Stack

CLOUD & SCRIPTING

- PowerShell / Azure CLI
- Python
- Linux / Shell
- VS Code

CERTIFICATIONS

- Microsoft Certified: Azure Administrator (AZ-104) Coursera_Packt
- MS Power BI/ Power Automate
- Prompt Engineering & AI Agents
- Generative AI
- Landing AI_VisualPrompting
- Software Architecture Foundations
- People Management

SHARAD KUMAR MISHRA

Senior DevOps Engineer | Azure Cloud Architect | AKS | Terraform | Kubernetes | Azure DevOps | GitHub Actions |16+ Years IT Leadership

PROFILE SUMMARY

Azure DevOps & Cloud Engineer with **16+ Years** of IT experience, including **7+ Years** of hands-on expertise in **Azure Cloud**, Cloud Architecture, **Azure Landing Zones**, Infrastructure as Code (**Terraform**), **GitHub Actions, Azure DevOps (ADO**) with Classic & YAML pielines, and **Kubernetes**-based platform engineering. Proven experience designing and implementing enterprise-scale, multi-subscription Azure foundations, production-grade AKS platforms, and **GitOps-**driven CI/CD pipelines aligned with high availability and reliability objectives. Strong expertise in Kubernetes networking, cloud security, shift-left **DevSecOps**, observability, automation and Azure **cost** governance. Experienced in leveraging **Generative AI** to accelerate cloud operations, troubleshooting, automation and engineering productivity.

PROFESSIONAL EXPERIENCE

Sr. DevOps Engineer & Gen AI *—Reliance Industries Limited* **Aug 2023 – Present**

- Built the IaC foundation using **Terraform** with reusable **modules** and remote **state management**, enabling consistent, auditable Azure provisioning across multiple subscriptions with identity management & security.
- Architected enterprise **CI/CD Pipelines** with **GitHub Actions** and **Azure DevOps in Classic & YAML pipelines. S**upporting 15+ development teams across the organization.
- Led containerization strategy — **Dockerized microservices** deployed on **AKS** with **Helm** — achieving a 99.95% uptime SLA through **HPA/VPA autoscaling**.
- Embedded shift-left security across every pipeline with **SonarQube** quality gates, **Trivy** container scanning, and **SAST/DAST** testing.
- Introduced **GitOps** with **ArgoCD**, enabling zero-downtime Kubernetes deployments, full rollback capability, and complete audit trails.
- Configured **NGINX/AGIC ingress controllers** for secure, scalable traffic routing into AKS.
- **Governed** Azure spend through **tagging policies**, budget alerts, and reserved instance planning, improving cost visibility across teams.
- Applied **Generative AI** and **prompt engineering** to accelerate IaC authoring, pipeline troubleshooting, and operational scripting.
- Doing LLM/RAG training at POC level with MCP.
- Developed at POC, multiple AI agents for infrastructure provisioning, deployment automation, monitoring, security validation and compliance checks.
- Hands-on experience with **Azure Databricks** including Workspace, Compute/Clusters, Notebooks, Spark/PySpark and Delta Lake for scalable data processing.
- Implemented **Bronze → Silver → Gold** data engineering pipelines using PySpark, DataFrame transformations, aggregations, joins and Delta tables with Unity Catalog for data governance.
- Integrated Databricks with Azure services (**ADLS Gen2, Azure Key Vault, Azure DevOps/Terraform**) and explored CI/CD and infrastructure-as-code practices for Databricks workloads.
- Delivered projects on Azure AI Foundry for building and managing AI applications and agents.
- Familiar with AI model deployment, prompt engineering, and basic evaluation/monitoring within the Azure ecosystem.

EDUCATION

B.Tech, Electronics & Communication
UP Technical University, 2006–2010

SOFT SKILLS

- Technical Leadership
- Cloud Architecture & Design
- Agile / Scrum Delivery
- Vendor Management
- Mentoring & Coaching
- Executive Reporting & MIS
- Draw.io, Advanced MS Excel

- Automated scheduled operational notifications by integrating **ADO Pipelines** with **PowerShell** and **Slack**, including success/failure alerts, task reminders, and team event notifications, reducing manual intervention.

Cloud Engineer (Azure) — *Reliance Projects & Pro Mgmt. Ser Ltd* **Sep-19 – Jul-23**

- Designed and managed large-scale Azure Networking environments — **VNets, NSGs, ExpressRoute**, and **Azure AD** for enterprise-wide applications.
- Migrated 80+ on-premise workloads to Azure using **Azure Migrate and ASR**, cutting infrastructure costs by 35% while maintaining 99.95% availability.
- Established a **hub-spoke Landing Zone** architecture with **Azure Firewall**, centralized **RBAC**, and Security Center compliance posture.
- Built Azure DevOps pipelines that reduced web and backend release cycles from weeks to days.
- Automated cloud operations using **PowerShell**, **Azure CLI**, and **Python**, incorporating early **AI-assisted** scripting.

Senior IT Network Admin Engineer — *Reliance Jio Info. Ltd.* **Sep-15 – Aug-19**

- Automated infrastructure monitoring workflows across geographically distributed on-prem data centers.
- Deployed and managed monitoring/diagnostics tooling (TEMS, XCAL, Actix) and engineered automated KPI dashboards, cutting reporting overhead by 8+ hours/week.
- Built shared runbooks and escalation playbooks that improved incident response time and reduced MTTR for production issues.

Network App Performance Engineer — *Steelman Telecom Ltd.* **Aug-14 – Sep-15**

Directed NMS/ITSM platforms, network monitoring, alerting, and root-cause analysis on critical incidents via monolithic app.

IT Support Engineer, XCAL Tool Support — *Solution Provider* **Jun-12 – Jul-14**

- Tier-2 support for XCAL/Accuvar drive-test systems; maintained 95%+ ticket resolution SLA across telecom circles and Nepal.

IT Engineer, OSS & Citrix — *Air Network Solution* **Jun-10 – Jun-12**

Administered OSS/Citrix platforms and supported LAN/WAN infrastructure, user provisioning, and IT asset management.

KEY PROJECTS

- JCP Landing Zone — enterprise Azure landing zone design and rollout.
- Azure Cloud Landing Zone & Migration — hub-spoke architecture and workload migration.
- Mahakumbh Traffic Management — Digital Transformation Initiative, winner of Best DevOps Innovator 2025.
- JPW Mobile App Deployment — CI/CD pipeline and release automation.
- IoT-Based UPPCL/DVVNL Project — infrastructure monitoring and automation.

AWARDS & RECOGNITION

- Best DevOps Innovator — Digital Transformation Initiative (Mahakumbh Project), Reliance Industries Ltd., 2025
- Star Performer Award — High Infra Uptime, Reliance Jio Infocomm, 2018
- Best Performer Award — Infra Rollout & Deployment, Reliance Jio Infocomm, 2017
- Best Support Engineer — XCAL Tools, Solution Provider, 2013
